- 5/11/01 Submitted final SWMU6 Sampling Report to EPA.
- 5/11/01 Delivered draft Current Conditions Report to EPA and DEQ.
- 5/11/01 Delivered draft Work Plan Addendum 012 Site Characterization Work Plan EPA and DEQ.
- 5/4/01 Responded to EPA and DEQ comments on the draft Facility-Wide Background Study Report.
- 5/01 Continued preparation of updated Master Work Plans, Work Plan Addendum 013 (SWMU 54), and Work Plan Addendum 014 (SWMU 40/71).
- 4/30-5/5/01 Performed background geophysical and topographic survey fieldwork tasks at SWMU 40/71 and SWMU 54.
- 4/10/01 Delivered draft Work Plan Addendum 009 SWMU 31 and Horseshoe Area Groundwater Study to EPA and DEQ.
- 4/5/01 Kickoff meeting for RFI/CMS efforts at SWMUs 40/71 and SWMU 54 with representatives from RFAAP, USACE, URS, and URS's subcontractors.
- 4/2/01 DEQ Background Study Report comments received by RFAAP.
- 3/20/01 Held conference call with DEQ and USEPA relative to DEQ comments on the Background Study Report.
- 3/15/2001 RAB meeting held.
- 2/28/01 Received DEQ Comments on SWMU 6 Sampling Report
- 2/23/01 Informed EPA and DEQ that a new area of concern has been identified in the area of HWMU 5.
- 2/9/01 RFAAP submitted Background Study Report to EPA for review and approval.
- 1/26/01 RFAAP submitted SWMU 6 Sampling Report to EPA for review and approval.
- 1/18/2001 RAB meeting held.
- 12/15/00 Commenced development of the SWMU 6 Sampling Report.
- 12/8/00 Coordinated transport and disposal of SWMU 6 IDM as non-hazardous waste.
- 12/1/00 Commenced development of the facility-wide background study report to assess the native concentrations of metals in the Main Manufacturing Area and New River Unit.
- 11/27 – 12/1/00 Received SWMU 6 TCLP data from analytical laboratory. Reviewed data packages for completeness and accuracy. Waiting on reactivity analyses to

complete waste characterization. Available data indicates that wastes will be characterized as non-hazardous.

- 11/17-11/20/00      Conducted a supplementary spring survey in conjunction with the Regional Groundwater Study to locate springs when the river was lowered an additional five feet. Measured bedrock strike and dip, fracture orientation, and faulting to complete site geologic information. Results of this effort will be incorporated into the current conditions and augment the understanding of groundwater hydrogeology within the Horseshoe Area.
- 11/13 – 11/17/00      Published Final Work Plan Addendum No. 11 incorporating EPA Region III and DEQ comments based on 10/26/00 meeting. Implemented SWMU 6 field investigation program. Field activities accomplished – completion of 12 Geoprobe borings to depths of 20 to 28 feet, collecting composite TCLP samples for waste characterization and discrete samples for RBC screening analyses, and obtaining GPS horizontal coordinates for borings. Field and analytical data will be incorporated into SWMU 6 Sampling Report.
- 11/16/00                RAB meeting held.
- 10/23-10/27/00      Selected potential upstream and downstream locations for placement of river gauges in conjunction with regional groundwater study. Conducted a site reconnaissance to evaluate existing springs and seeps during low river flow.
- 10/26/00                Met with EPA Region III and DEQ to discuss SWMU 6 sampling plan details. Sampling effort scheduled to start 11/13/00.
- 9/29/00                 Completed background study field activities associated with the sampling and collection of surface and subsurface soil samples in the Main Manufacturing Area and the New River Unit.
- 8/28/00                 Mobilized field activities in support of the background study. Commenced investigative activities at the New River Unit.
- 8/10/00                 Presented background study strategy to EPA Region III for review and comment. Received EPA approval to initiate background study field activities.
- 7/24/00-8/04/00      Continued groundwater data evaluation in support of the groundwater study. Refined background study presentation to ensure statistical data issues were adequately resolved.
- 7/20/00                 Met with RAB to introduce Virginia Department of Environmental Quality participants, discuss RAB community co-chair, Installation Action Plan workshop, project status update, RAB membership, and the next meeting schedule.
- 7/7/00-7/21/00      Developed draft background study presentation to identify sample locations, location rationale, and the number of samples proposed for collection at the Main Manufacturing Area and the New River Unit.
- 6/27/00-6/29/00      Proposed background soil sampling locations to the Army and ACE. Ground-truthed the proposed locations to ensure they would be representative of areas that either reflect native conditions or conditions that have been minimally impacted by previous facility operations.

---

- 6/13/00-6/15/00 Continued the fracture trace photolineament and river profile studies in support of the regional groundwater study survey.
- 6/1/00 Commenced activities on background study services procured by the Army. Evaluated project information to identify preliminary background sample locations.
- 5/24/00 Commenced evaluation of Horseshoe Area quarterly groundwater data.
- 5/18/00 RAB meeting held.
- 5/18/00 Participated in a site reconnaissance with the EPA RCRA manager and toxicologist to familiarize them with the site and discuss permit reauthorization procedures. Met with the RAB to discuss regional groundwater conditions and permitting activities.
- 5/8/00-5/11/00 Continue fracture trace verification. Commenced river profile work. Transects were established to measure bottom profiles and flow rate during normal river levels. Completed spring survey.
- 4/17/00-4/20/00 Completed initial water elevation survey in the Horseshoe Area. Commenced fracture trace survey. Continued spring survey.
- 4/00 Developing draft hydrogeologic setting based on the current data. The hydrogeologic setting will be refined as data interpretation activities progress.
- 3/27/00-3/29/00 Began a survey to identify springs and seeps. Verified thermal flyover signatures associated with groundwater discharge points.
- 3/16/00 RAB meeting held.
- 3/16/00 Met with Army, USACE, and USEPA to discuss the regional groundwater study and WPA9. Conducted a site reconnaissance to orient the USEPA hydrogeologist with the site.
- 2/00 Finished SWMU 54 data inventory assessment and retrieved missing data from contract laboratory.
- 1/00 Finalized background study design elements and presented to USEPA. Coordinated SWMU 54 data inventory assessment activities with the Army and USACE.
- 1/17/00-1/19/00 Obtained GPS map coordinates for samples previously collected at the Northern Burning Ground, Western Burning Ground, and Building 4343.
- 12/14/99 Performed thermal flyover at the Installation to identify underground springs and seeps to assist in the characterization of groundwater flow within the Horseshoe Area.
- 12/07/99 Met with the Army, USEPA, and USACE to discuss a background study approach that would be scientifically defensible. Came to consensus on the study design and the minimum number of samples required to achieve a specified precision and confidence level.

- 12/01/99                      Received response to comments from USEPA on the statistical inorganic background study outline.
- 12/99                              Submitted WPA Addendum 9 to the Army, USEPA, and Commonwealth of Virginia for review and approval. Submitted acronym list to Katie Phillips for review. Submitted photographs taken during field activities to be included on the web page, as appropriate.
- 11/30/99                      Received response to comments from USEPA on the Draft Screening Ecological Risk Assessment.
- 11/06/99                      Provided third-party audit oversight for the completeness inventory of SWMU 54 Level 4 data. Coordinated project activities with the Army and USACE to ensure data integrity and completeness.
- 11/04/99                      RAB meeting held.
- 11/99                              Assisted the Army in designing a statistical inorganic background strategy to address facility-wide inorganic concentrations. A copy of the outline was provided to USEPA for review and approval.
- 10/04/99-10/08/99              Completed additional borings at Building 4343 and Western Burning Grounds.
- 09/27/99                      Met with Army and USEPA to discuss updated screening procedures for sites that may not require any further action. USEPA proposed the use of a screening document being developed at another installation. Upon receipt of the approved document, the Army will determine which portions will be adopted to address RFAAP site-specific activities.
- 09/16/99                      RAB meeting held.
- 09/13/99-09/17/99              Site restoration activities at the Western Burning Ground.
- 09/06/99-09/10/99              Reevaluated investigation strategy at Building 4343. Begin revisions to Work Plan Addendum 9.
- 09/01/99-09/03/99              Reviewed Northern Burning Ground pre-characterization data.
- 09/99                              Commenced development of Work Plan Addendum 9 for additional characterization at SWMUs 31, 48, and 49 and the regional groundwater study evaluation within the Horseshoe Area. Submitted Draft Screening Ecological Risk Assessment document to Army, USEPA, and the Commonwealth of Virginia for review and approval.
- 08/06/99-08/20/99              Collected additional pre-characterization samples at the Northern Burning Ground to focus delineation of hot spots. Collected remaining wipe samples at Building 4343. Backfilled the Western Burning Ground.
- 08/09/99-08/13/99              Geoprobe borings at Building 4343 to delineate extent of contamination. Geoprobe borings in Western Burning Ground berms.
- 08/03/99-08/06/99              Commenced data validation activities.
- 07/22/99                      RAB meeting held.
